Description		
<p>With QGIS master, when loading a plugin layer (Crayfish in my case) I get the following error:</p> <p>NotImplementedError: QgsPluginLayer.writeStyle() is abstract and must be overridden</p> <p>Python version: 2.7.6 (default, Jun 22 2015, 18:01:27) [GCC 4.8.2] QGIS version: 2.15.0-Master Master, f645b79</p> <p>This is likely to be due to the new dock style manager.</p>
