Affected QGIS version:masterRegression?:NoOperating System:Easy fix?:No

Pull Request or Patch supplied: Resolution:

Crashes QGIS or corrupts data: Copied to github as #: 23047

Description

With QGIS master, when loading a plugin layer (Crayfish in my case) I get the following error:

Not Implemented Error: QgsPlugin Layer. write Style () is abstract and must be overridden and the structure of the structur

Python version: 2.7.6 (default, Jun 22 2015, 18:01:27) [GCC 4.8.2]

QGIS version: 2.15.0-Master Master, f645b79

This is likely to be due to the new dock style manager.
