

QGIS Application - Feature request #15132

Make outline color of simple symbols changeable automatically

2016-06-25 07:05 AM - Anita Graser

Status:	Closed	Resolution: Copied to github as #: 23072
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>Some simple symbols, such as "line" or "arrowhead" only consist of outlines. When changing the color of the symbol, only the fill color is changed automatically, while the outline color remains unchanged. This means that outline-only symbols cannot comfortably be used in graduated or categorized renderers because their color does not change automatically.</p> <p>I'm aware of the workaround of using the @symbol_color expression but this still has the disadvantage of not generating a usable legend.</p>

Make outline only simple markers work with categorised/graduated etc renderers (fix #15132)

History

#1 - 2016-06-25 09:13 AM - Harrissou Santanna

+1

I often fail on changing color and then remark that it was about fill color (which was None in my symbol) instead of outline's.

@Anita, isn't @symbol_color about fill color, too?

#2 - 2016-06-25 12:01 PM - Anita Graser

@Harrissou symbol color is usually applied to symbol layer fill colors but with data defined overrides, users can also define to apply it to outline colors. (But this is not reflected in the layer legend unfortunately, because there is no legend for data defined overrides.)
