

# QGIS Application - Bug report #15140

## Item snapping in print composer

2016-06-26 01:06 PM - R. R.

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Map Composer/Printing	
<b>Affected QGIS version:</b> 2.14.3	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> wontfix
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 23079
<b>Description</b>	
When moving an item in the print composer, snapping depends on the width of the border. To me it would be more meaningful to snap to the middle of the border.	

### History

#### #1 - 2016-06-26 01:07 PM - R. R.

- File 15140.mp4 added

#### #2 - 2016-06-26 02:15 PM - Nyal Dawson

- Resolution set to wontfix

- Status changed from Open to Closed

This is by design, and is the usual behaviour in DTP packages

#### #3 - 2016-06-26 03:01 PM - R. R.

- File scribus\_1\_4\_6\_snapping.mp4 added

Hi Nyal, I can't confirm this for Scribus (see screencast).

#### #4 - 2016-06-26 03:07 PM - Nyal Dawson

Maybe not all DTP then ;) more discussion in #8943

#### #5 - 2016-07-03 01:45 AM - R. R.

I noticed that the print composers' snapping behaviour differs from Adobe InDesign. When snapping two items with different border widths to a guide in InDesign, their coordinates are the same. This should be the default snapping behaviour in QGIS, too.
