QGIS Application - Bug report #15152
Inconsistent behaviour of "Add" button in Add PostGIS Table(s) dialog

2016-06-27 06:15 AM - Casper Børgesen

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Data Provider/PostGIS		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	end of life
Crashes QGIS or corrupts data:		**Copied to github as #:**	23091

Description

When adding a WMS layer using the *Add WMS/WMTS Layer* window you have the option of pressing *Add* when an entry is selected or *Close*. If you press *Add* the layer will be added and you an choose to add another layer. When you press *Close* the window closes.

When adding a PostGIS layer using the *Add PostGIS Table(s)* windows you have the option of pressing *Add* when a table is selected or *Close*. If you press *Add* the table will be added as a layer and the window closes. When you press *Close* the window closes.

Which action is the intended? Should the window close after you press *Add* or should it stay open.

I clearly prefer it to stay open and actively decide when it should close.

History

#1 - 2016-06-27 06:40 AM - Alexander Bruy

- OS version deleted (7 x64)

- Category set to Data Provider/PostGIS

- Operating System deleted (windows)

In "Add PostGIS Table(s)" dialog you have a checkox under the table list (look at the right) called "Keep dialog open". If you check it, dialog won't be closed after pressing "Add" button.

You're right, I haven't seen that before and it works.

But I still think that the various *Add X Layer* dialogs should behave identically. I see that the WFS and the Spatialite dialog does the same as the PostGIS. WCS doesn't have a *Keep dialog open* option but instead having the *Close* and *Add* buttons switched in the UI.

#3 - 2017-05-01 01:05 AM - Giovanni Manghi

- Regression? set to No

- Easy fix? set to No

#4 - 2019-03-09 04:23 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
