

QGIS Application - Bug report #15157

Lack of standard features in Vector menu.

2016-06-28 08:24 AM - Michal Jurewicz

Status: Closed	
Priority: Normal	
Assignee:	
Category: GUI	
Affected QGIS version: master	Regression?: No
Operating System: OS X	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 23096
Description	
<p>I have two version of QGIS installed on my Mac - 2.14.3 and master 2.15 323abe3. For some time there is no standard (basic) vector edition and analyze option in Vector menu, like geometry tools and etc. Please, check the screenshot.</p> <p>How can I fix this? I believe it's some missing plugin or dependencies but I don't know which one.</p>

- Status changed from Open to Feedback

Please check that you have no Processing plugin in your ~/.qgis2/python/plugins.

#2 - 2016-06-30 07:13 AM - Michal Jurewicz

I had and I deleted processing/ in this location and nothing changed. Still there aren't these functions in master.

#3 - 2016-06-30 01:29 PM - Calvin Hamilton

See ticket #15118. They are both talking about the same problem. I had to delete the HKEY_CURRENT_USER->Software->QGIS registry to clean it up. Something is getting clobbered.

#4 - 2016-07-01 02:39 AM - Michal Jurewicz

I have installed QuickMapService, so it can be the same problem. How to repair this on OS X? There is no Registry Keys :)

#5 - 2016-07-01 05:28 AM - Calvin Hamilton

Someone else will have to answer that since I don't work with OS X.

#6 - 2016-07-03 12:51 AM - Michal Jurewicz

It has to be something different. I deleted both QGIS version with all additional files like ~/.qgis2 and qgis plist in ~/Library/Preferences, then I reinstall fresh copy of master and still the same problem.

Hello,

I'm using QGIS dev (2.15.0-Master, a0f329e) on Ubuntu and have the same problem : no vector tools in the Vector menu.
When using QGIS 2.14.2 compiled from source, everything is fine.

#9 - 2017-01-03 05:39 AM - Giovanni Manghi

- *Status changed from Feedback to Closed*
- *Resolution set to invalid*

In general there are no issues with multiple installations (in particular under Windows) but under Linux and OsX can be more tricky and source of problems. Moreover "Master" ~~the development version of QGIS~~ can always come with some issue.

#10 - 2017-01-03 05:45 AM - Jonathan Virga

My issue came from an old processing directory in .qgis2/python/plugins.
Fixed by deleting it.
