

QGIS Application - Bug report #15171

style dock: load min / max values' current extent not working properly

2016-06-29 01:10 AM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Nyall Dawson	
Category:	GUI	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 23110
Description		
<p>The load min / max values widget registers a static extent value, which was fine when it was part of a modal dialog but not so when part of the non-blocking style dock.</p> <p>The solution would be to pass onto the widget a reference to the map canvas element to dynamically retrieve the extent upon click on the [Load] button.</p>
