

QGIS Application - Bug report #15189

Startup.py executed twice

2016-07-01 07:02 AM - Alex Eastwood

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	PyQGIS Console	
Affected QGIS version:	2.14.3	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 23128

Description

In my startup.py file (in [user]\\..qgis\\python) I have simply

```
import qgis
qgis.utils.iface.actionShowPythonDialog().trigger()

print "hello world"
```

the console opens as expected, but my 'hello world' message consistently prints out twice. I [posted](#) on the GIS Stackexchange site where it appears at least 1 other user has experienced the same issue.
