

QGIS Application - Feature request #1520

After adding a column for OGR-Layer, column doesn't appear in attribute table

2009-01-30 03:00 AM - Horst Düster

Status:	Closed	
Priority:	Low	
Assignee:	Redmine Admin	
Category:	GUI	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11580
Description		
When I add a column to an OGR layer it is nessecary to drop and reload the layer from the legend to see the new column.

Unable to replicate this ticket in my windows machine with qgis 1.1.0, was this fixed with the beata code included to trunk?

Replying to [comment:2 gcontreras]:

Unable to replicate this ticket in my windows machine with qgis 1.1.0, was this fixed with the beata code included to trunk?

The issue is still present.

- 1. Load a shape layer to QGIS
- 2. Open Layer Properties->Attributes
- 3. Toggle editing and add an attribute
- 4. stop editing and save changes
- 5. close Layer Properties
- 6. repeat step 2

=> The new attribute column doesn't exists

To see the column you have to unload and reload the layer.

#3 - 2009-05-13 01:56 PM - Redmine Admin

Just added a patch in case someone want to check it. If it works correctly I will upload it to trunk.

#4 - 2009-06-12 12:43 PM - Redmine Admin

- Resolution set to fixed
- Status changed from Open to Closed

Patch applied to trunk in revision 10914

Sorry, I meant
