

QGIS Application - Feature request #15216

Consider merging the content of alexbryu/mergeshapes into main trunk

2016-07-04 10:58 AM - Stephen Knox

Status: Closed	
Priority: Normal

Category: Unknown	
Pull Request or Patch Supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 23153
Description	
<p>In the main trunk, when using Vector -> Data Management -> Merge Shapefiles to One there is currently no way to add the filename of the various merged shapefiles into the final shapefile. This is very useful, and functionality is exposed in alexbryu/mergeshapes. It took me a while to find this as I assumed it was a core plugin. I don't see the value of having one plugin that does "slightly" more than the core functionality, so I think this should be merged in. I might be able to give it a go, but the code is quite different.</p>
