

## QGIS Application - Bug report #15240

### Crash when loading zipped ShapeFiles

2016-07-08 01:36 AM - Tobias Preuss

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>		
<b>Category:</b>	Vectors	
<b>Affected QGIS version:</b>	2.14.3	<b>Regression?:</b> No
<b>Operating System:</b>	Ubuntu	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> not reproducible
<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 23176
<b>Description</b>		
<p>QGIS 2.14.3 crashes when I use the "Add Vector Layer" button or menu to pick a zipped ShapeFiles file.</p> <p>I can reproduce this best when QGIS is started fresh. Most of the times it crashes immediately - in rare cases not.</p> <p>The data can be imported without problems if I unarchive the zip file.</p> <p>Let me know if I can produce any debug information. Please tell me how.</p>		

#### History

##### #1 - 2017-03-07 11:01 AM - Giovanni Manghi

- *Crashes QGIS or corrupts data changed from No to Yes*
- *Resolution set to not reproducible*
- *Priority changed from Normal to High*
- *Status changed from Open to Closed*
- *Category set to Vectors*

Works without issues on 2.18.4 on both Windows and Ubuntu 16.04.
