

QGIS Application - Bug report #15240

Crash when loading zipped ShapeFiles

2016-07-08 01:36 AM - Tobias Preuss

Status: Closed	
Priority: High	
Assignee:	
Category: Vectors	
Affected QGIS version: 2.14.3	Regression?: No
Operating System: Ubuntu	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: not reproducible
Crashes QGIS or corrupts data: Yes	Copied to github as #: 23176
Description	
<p>QGIS 2.14.3 crashes when I use the "Add Vector Layer" button or menu to pick a zipped ShapeFiles file. I can reproduce this best when QGIS is started fresh. Most of the times it crashes immediately - in rare cases not.</p> <p>The data can be imported without problems if I unarchive the zip file.</p> <p>Let me know if I can produce any debug information. Please tell me how.</p>	

History

#1 - 2017-03-07 11:01 AM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from No to Yes
- Resolution set to not reproducible
- Priority changed from Normal to High
- Status changed from Open to Closed
- Category set to Vectors

Works without issues on 2.18.4 on both Windows and Ubuntu 16.04.
