

QGIS Application - Feature request #15266

indicator when voting for plugins via plugin manager

2016-07-12 01:50 PM - Donovan Cameron

Status:	Open	Resolution: Copied to github as #: 23202
Priority:	Normal	
Assignee:	Borys Jurgiel	
Category:	Plugin Manager	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>I think I sent in a bunch of votes for a single plugin by accident...</p> <p>I noticed when I click the star when I want to vote there is a message at the top of screen saying vote was sent. Cool.</p> <p>But, there's nothing there to let me know that I've voted for that plugin if I ever come back to it in the plugin manager.</p> <p>The stars all look the same yellow and I can't see what I voted for in the past.</p> <p>For example, maybe it would be nice to change the colours of the stars (to red or green?) when I've voted for a specific plugin, or maybe even apply bold to the stars.</p>

Maybe a nice addition would be to keep track of votes done online via plugins.qgis.org and maybe link those votes to a user account (if a user account was used).

The user could input their user/pass in QGIS to let the QGIS application know what account they should pull up past votes for.
