

QGIS Application - Bug report #15285

Clipper should default to -of GTiff

2016-07-14 09:23 AM - belg4mit -

Status: Closed	
Priority: Normal	
Assignee:	
Category: Processing/GDAL	
Affected QGIS version: 2.16.0	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 23220

Description

Either default to GTiff, or smartly select between GTiff and ESRI as appropriate. I have a TIFF with values up to 1E9, and when I try to clip it the constructed command defaults to -of EHdr resulting in:

```
| ERROR 1: Attempt to create ESRI .hdr labelled dataset with an illegal data type (Float64).
```

History

#1 - 2017-02-09 12:50 PM - Alexander Bruy

- Resolution set to fixed/implemented
- Category changed from Rasters to Processing/GDAL

Should be fixed in Processing front-end

#2 - 2017-02-09 03:12 PM - Nyal Dawson

- Status changed from Open to Closed
