Affected QGIS version:2.16.0		Regression?:	No
Operating System:		Easy fix?:	No
Pull Request or Patch sumplied:		Resolution:	
Crashes QGIS or corru ptis data:		Copied to github as #	: 23266
Description			
Graphic modeler and Commander have the same default shortcut (CTRL+ALT+M) so you can't open neither of them with it.			

You have to manually change shortcut for one of them in order to be able to open both of them.

Expected behaviour:

Every menu option should have unique shortcut.
