

QGIS Application - Feature request #1536
Renaming a layer using an already existing name should issue a warning

2009-02-10 06:15 AM - nikos -

Status:	Open	Resolution: Copied to github as #: 11596
Priority:	Low	
Assignee:	nobody -	
Category:	Map Legend	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
An error message should appear if one tries, by mistake, to use a name for a layer (in the legend of course) which is already used for another layer.		
Thank you, Nikos

I cannot reproduce it: the layer name is changed without a crash. Could you please check it again, and close it if invalid, or give additional info to reproduce the bug? Thanks.

Can't (re-)produce the crash anymore !? But the *wish* for an *informative* message that "a layer with the same name already exists in the legend" is valid :-)
