

QGIS Application - Feature request #15394
properties menu of raster data, grd

2016-08-05 03:31 AM - Marcus Schneider

Status:	Feedback	Resolution: Copied to github as #: 23324
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Not supplied	
Easy fix?:	No	
Description		
<p>why was the properties menu for raster changed in qgis 2.16?</p> <p>First of all I like the old funktion, that i could just change the properties for the chosen area, and not allways for the whole map.</p> <p>Second, if I change for example, the hight values in d a grid, it want have any effect, when i will invert the scale.</p> <p>And third, it happens a lot, that i just get no result. The maps rests white, blanco ...</p> <p>Proberbly I am to stupid, to see the advantage of the new menu; but realy I liked the old one more. For me a reason not to change to 2.16.</p>

- OS version deleted (Windows 7)
- Operating System deleted (Windows)
- Status changed from Open to Feedback
- Category deleted (Actions)

Can you describe more precisely what is not working?
