

QGIS Application - Bug report #15395

QGIS 2.16 adding certain WFS failed

2016-08-05 04:35 AM - Niels Gerrits

Status: Closed	
Priority: Normal	
Assignee: Even Rouault	
Category: Web Services clients/WFS	
Affected QGIS version: 2.16.1	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: fixed/implemented
Crashes QGIS or corrupts data: No	Copied to github as #: 23325
Description	
<p>First bug report on here so please be gentle...</p> <p>After switching from 2.14.1 to 2.16.1 adding layers from a certain WFS results in an error, example is with version 1.0.0 forced:</p> <p>Layer is not valid: The layer srsname='EPSG:28992' typename='app:Bouwvlak' url='http://afnemers.ruimtelijkeplannen.nl/afnemers2012/services?' version='1.0.0' table='' sql= is not a valid layer and can not be added to the map</p> <p>QGIS WFS log:</p> <p>Analysis of DescribeFeatureType response failed for url srsname='EPSG:28992' typename='app:Bouwvlak' url='http://afnemers.ruimtelijkeplannen.nl/afnemers2012/services?' version='1.0.0' table='' sql=: Cannot find element 'Bouwvlak'</p> <p>Guess the problem is in parsing the DescribeFeatureType response, but I do find the element 'Bouwvlak'.</p> <p>I wrote a bigger article on GIS SE but not sure I should drop it in here as well. http://gis.stackexchange.com/questions/205926/qgis-2-16-adding-certain-wfs-failed?noredirect=1#comment312533_205926</p>	

History

#1 - 2016-08-08 06:11 AM - Even Rouault

- Assignee set to Even Rouault

#2 - 2016-08-08 06:44 AM - Even Rouault

- Resolution set to fixed/implemented

- % Done changed from 0 to 100

- Status changed from Open to Closed

Fixed per commit:4bcbc1e (and backported in master_2 in commit:f17f6ac, and in release-2_16 commit:a0e3e76)
