<b>Affected QGIS version:</b> 2.16.1	<b>Regression?:</b> No
<b>Operating System:</b> Linux Mint	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 23338

#### Description

When execute "Run as batch process..." from the algorithm dialog and select the clipping extent for algorithm by "Select extent on canvas" cursor change to cross batch processing window blink once and you are not able to choose the extent. If the batch processing is executed directly from Processing Toolbox panel (left click Execute as batch process) it works fine. I tried this on "Clip raster by extent" (GDAL) and "Random points in extent" (QGIS) with the same result.
