|---|-------------------------------------|
| Status: Closed | |
| Priority: Low | |
| Assignee: nobody - | |
| Category: C++ Plugins | |
| Affected QGIS version: | Regression?: No |
| Operating System: Debian | Easy fix?: No |
| Pull Request or Patch supplied: | Resolution: fixed |
| Crashes QGIS or corrupts data: | Copied to github as #: 11612 |
| Description | |
| <p>Hello,</p> <p>I correctly set the proxy in QGIS preferences.</p> <p>My organisation uses squid.</p> <p>But the following actions do not work:</p> <ul style="list-style-type: none">- fetch from WFS/WMS- install plugins from the net- use the refmap plugins | |

History

#1 - 2009-03-21 09:50 AM - Borys Jurgiel

What QGIS version do you use?

#2 - 2009-04-07 05:52 AM - Mavka -

Will be fixed in 1.1.0 version.

In QGIS-1.1.0-unstable-trunk on Windows XP

Proxy type: [[DefaultProxy]] - not work

Proxy type: [[HttpCachingProxy]] - all work good

#3 - 2009-04-21 08:16 AM - Paolo Cavallini

Is this solved in trunk? If so, please close it.

#4 - 2009-04-21 11:43 PM - Mavka -

- Resolution set to fixed

- Status changed from Open to Closed

Problem solved
