

QGIS Application - Bug report #15554

v.net.alloc in processing fails when there are spaces in the layer name

2016-09-11 03:10 PM - Steven Kay

Status: Closed	
Priority: Normal	
Assignee: Victor Olaya	
Category: Processing/GRASS	
Affected QGIS version: 2.16.1	Regression?: No
Operating System: ubuntu	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 23477
Description	
<p>Just had a problem getting v.net.alloc to work in qgis 2.16.1 from processing.</p> <p>Traced it to the following line in the log...</p> <pre>v.in.ogr min_area=0.0001 snap=-1 input="/home/steven/infviz7/watersheds/airports" layer=airports 27700 output=tmp14736310937613 --overwrite -o</pre> <p>My layer is called "airports 27700", which contains a space. It looks like the lack of quotes around the layer parameter is what causes it to fail. Renaming the layer to "airports_27700" or "airports27700" works.</p>
