| Description | | |
| <p>I recently worked with adjacent entities where differences between coordinates in common edge were only below to 0.000000001 (map units: meters).</p> <p>In my opinion, this tool would be more robust if allowed to establish a tolerance to decide when two coordinates are equal.</p> <p>Another option would be to use the same tool tolerance used in the environment snap.</p> <p>I attach a zip file with a brief sample for this problem..</p> | | |
