

QGIS Application - Bug report #15576

QGIS is lagging after a few saves in PostGIS layers

2016-09-17 08:41 PM - Luiz Andrade

Status:	Closed	
Priority:	High	
Assignee:	Jürgen Fischer	
Category:	Data Provider/PostGIS	
Affected QGIS version:	2.14.5	Regression?: No
Operating System:	Kubuntu	Easy fix?: No
Pull Request or Patch applied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 23500
Description		
<p>In Kubuntu 14.04 after a few editing rounds on PostGIS layers QGIS starts to lag until it becomes unresponsive. I need to kill the application and start over. All data is saved correctly.</p> <p>But, when checking my Postgresql log I could get this: "could not receive data from client: Connection reset by peer"</p> <p>This means that the QGIS's connection is getting broke in same way.</p> <p>This happens when working with topology layers and SFS layers.</p>		

History

Hi Luiz, have you tried to deinstall all 3rd party plugins?

#2 - 2017-02-04 02:50 AM - Giovanni Manghi

- Priority changed from Normal to High

#3 - 2017-03-07 08:11 AM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Open to Closed

Closing for lack of feedback. Symptoms like this ones were reported several times, most of them the problem was a 3rd party plugin.
