Category:	Attribute table		
Affected QGIS version:	2.16.2	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	worksforme
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23503

Description

It isn't possible to copy attribute values from the attribut-table by marking them and pressing CRT+C and CRT+V.
If you do that you only copy the attribute names (see example below).

[id fow name]

The only way to copy attribute values is by clicking into the cell, right click and select "open in formular", right click on value in the formular and select "select all", right click again and select "copy".

Could produce this issue in Version 2.14.6 and 2.16.2
