

QGIS Application - Bug report #15582

Union error: "global name 'vproviderA' is not defined"

2016-09-19 08:23 AM - Hugo Nicolau Barbosa de Gusmão

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	2.16.2	Regression?: No
Operating System:	Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 23506
Description		
Hi everyone!		
In Qgis 2.16.2-2 and 2.16.2-3 the "Join" tool does not work . When trying to join two shapefiles , an error occurs : "global name 'vproviderA' is not defined. See log for more details" .		
Log: File "C:/PROGRA~1/QGIS2~1.16/apps/qgis/./python/plugins\processing\algs\qgis\Union.py", line 78, in processAlgorithm geomType, vproviderA.crs()) NameError: global name 'vproviderA' is not defined.		

History

#1 - 2016-09-20 12:25 AM - Frank Sokolic

I get the same error when using the Union tool on QGIS Master with Ubuntu 16.04. The error occurs when accessing the tool via the menu (Vector > Geoprocessing Tools > Union) or via the Processing toolbox (QGIS Algorithms > Vector overlay tools > Union).

#2 - 2016-09-22 08:36 AM - Victor Ducrot

Same error and manjaro linux (based on arch).

#3 - 2016-09-22 08:46 AM - Victor Ducrot

vproviderA has to be replaced by vlayerA line 78 of /usr/share/qgis/python/plugins/processing/algs/qgis/Union.py in Linux.

The modification seems to have been done already on qgis-master on github:

<https://github.com/qgis/QGIS/blob/master/python/plugins/processing/algs/qgis/Union.py>

You can also presumably just replace your Union.py file by this one.

#4 - 2016-09-26 02:46 PM - Ervin Wirth

The same error on Windows 7 64 bit with QGIS 2.16

#5 - 2016-10-04 12:52 AM - Eivind Olsen

Same error on Windows 7 64 bit with QGIS 2.16.3, both within QGIS and from a standalone script. Editing

"C:\\OSGeo4W64\\apps\\qgis\\python\\plugins\\processing\\algs\\qgis\\Union.py" as suggested in #4 above does the trick for the Union tool from within QGIS. It seems to fix the problem in the standalone script, but now produces new errors:

ERROR 1: Attempt to write non-polygon (MULTILINESTRING) geometry to POLYGON type shapefile.

ERROR 1: Attempt to write non-polygon (POINT) geometry to POLYGON type shapefile

#6 - 2016-12-28 09:53 AM - Alexander Bruy

- Status changed from Open to Closed
- Resolution set to fixed/implemented

Seems already fixed. Please reopen if necessary.

#7 - 2017-09-22 09:55 AM - Jürgen Fischer

- Category set to Unknown
