QGIS Application - Bug report #1559
WMS-Error on QGis 1.0.0 (Kore)

2009-02-24 07:33 AM - mikee63 -

Status:	Closed			
Priority:	Low			
Assignee:	mikee63 -			
Category:	Web Services clients/WMS			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	wontfix	
Crashes QGIS or corrupts data:		**Copied to github as #:**	11619	

Description

The problem is since update to v1.0.0 (KORE). The WMS-URL, wich I type was:
http://itcgeoservices01/cgi-bin/mapserv?map=/var/www/stadtplan/stadtplan.map&SERVICE=WMS. The program loads the layerlist
and when i select the layers, then i get the messages like:

Konnte nicht zeichnen sp weil:
WMS Server hat unerwarteterweise folgenden HTTP Status Code herausgegeben: 404 (Not Found)
Versuchte URL:
http://itcgeoservices01/cgi-bin/mapserv&map=/var/www/stadtplan/stadtplan.map&SERVICE=WMS?SERVICE=WMS&VERSION=1.1.1&REQ
=1.1.1&REQUEST=GetMap&BBOX=4489639.227269,5696644.382491,4507009.879162,5714211.627395&SRS=EPSG:2398&WIDTH=83
WIDTH=830&HEIGHT=840&LAYERS=stadtplan_highres_farbe%2Cstadtplan_lowres_farbe%2Cstadtplan_highres_grau%2Cstadtplan_lowr
dtplan_lowres_grau&STYLES=%2C%2C%2C&FORMAT=image/gif&TRANSPARENT=TRUE

The main error is the "&" after .../mapserv
QGis changed the "...mapserv?map=/var..." to "...mapserv&map=/var..."

History

If possible check the "wms_onlineresource" value in the meta data of the WEB section of the mapfile (or the response to the [[GetCapabilities]] request). I
expect you'll find two question marks there as QGIS doesn't append a question mark to URIs that already have one.

#2 - 2009-02-24 11:14 AM - mikee63 -

- Resolution set to wontfix
- Status changed from Open to Closed

the "wms_onlineresource" in the mapfile was the problem.
Thanks, it works.
