QGIS Application - Bug report #15591
Minscale down to 1:1 only

2016-09-20 10:21 PM - Paolo Cavallini

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Symbology			
Affected QGIS version:	2.16.2	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23515	

Description

Currently the min scale for scale dependent visualization is 1:1; 1:0 cannot be inserted.

As a result, zooming below 1:1 (e.g. 2:1) makes layer disappear.

It worked in a predictable way in previous versions.

Thanks Stefano for pointing this out.

History

- Priority changed from Normal to Severe/Regression

#2 - 2016-09-21 02:40 AM - Matthias Kuhn

It's a regression and causes severe confusion because properly configured layers disappear when reconfiguring unrelated properties. One layer here often gets reset its min/max to 1:5000/1:5000 which boils down to never show it.
