QGIS Application - Bug report #15596
WMS layers cannot be identified on QGIS >= 2.16.*

2016-09-21 05:27 AM - Giovanni Manghi

Status:	Closed			
Priority:	Severe/Regression			
Assignee:				
Category:	Web Services clients/WMS			
Affected QGIS version:	master_2	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**		
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23519	

Description

On Linux (as Windows seems ok, OsX to be confirmed) and QGIS 2.16.* WMS layers from a Geonode/Geoserver service do not return any values when identified (in identify dialog a "loading..." text is presented).

On the same platform, with QGIS 2.14.* it works as exptected.

OS is Ubuntu 16.04 and QGIS is always installed from official repos (both ltr and 2.16).

I can provide privately details to access to the Geoserver service.
