QGIS Application - Bug report #1560
virus

2009-02-24 07:08 PM - braindamage -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	C++ Plugins		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	invalid
Crashes QGIS or corrupts data:		**Copied to github as #:**	11620

Description

Trend Micro Internet Security has informed me that the file wxpython-2.8.9.1-2tar.bz2
has a virus. This was downloaded with the xp web install of qgis 1.   Is this a real virus???

I hope this is the place to report this.

Thanks

Looks like that's a false positive. I couldn't find any viruses using http://www.garyshood.com/virus/, clamscan or [[McAfee]].

> *I hope this is the place to report this.*

Not really, this bug isn't related to qgis in any way.

Bugs for OSGeo4W packages should be filed at http://trac.osgeo.org/osgeo4w/.
