<b>Category:</b> Unknown	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 23531
<b>Description</b>	
<p>The Identify layers tab in Project properties dialog offers ability to select multiple rows but you can't do anything with it. Some functions could be added in a context menu to:</p> <ul style="list-style-type: none"><li>- toggle/(un)check "Identifiable" status</li><li>- toggle/(un)check "Read only" state (if possible)</li><li>- toggle/(un)check "layer styling availability" (see #15607)</li></ul>
