QGIS Application - Bug report #15691
'Expand All'/'Collapse All' issue when opening a project

2016-10-11 10:04 AM - R. R.

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Unknown		
Affected QGIS version:	2.16.3	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:		**Copied to github as #:**	23614

Description

When opening a .qgis file all groups and layers are displayed expanded. It seems this issue is a regression: #2908

History

#1 - 2016-10-13 04:17 AM - Martin Dobias

- Status changed from Open to Feedback

So... if you save a project with some groups or layers collapsed, they are still shown expanded when you load the project again? If that's the case, I am unable to replicate the problem. Could you please attach more details on how to reproduce the problem and ideally add a test project that exhibits the problem?

#2 - 2016-10-13 04:38 AM - R. R.

- File 15691.wmv added

Hi Martin, I've uploaded a screencast to demonstrate the issue.

#3 - 2016-10-13 01:47 PM - R. R.

The state of collapsed groups or layers is only saved if this small triangle icon left to the layer's name is used.

#4 - 2016-10-13 08:23 PM - Martin Dobias

- Status changed from Feedback to Closed

Fixed in changeset commit:"de85fdd6e8fa3d4f38196376aabcccce317cbf341".

#5 - 2016-10-13 08:33 PM - R. R.

Thx!
