

QGIS Application - Bug report #15745

Processing iterate mode for QGIS tools creates empty files in "OSGeo4W/bin" folder

2016-10-22 12:12 PM - Giovanni Manghi

Status: Closed	
Priority: Normal	
Assignee: Victor Olaya	
Category: Processing/Core	
Affected QGIS version: master_2	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 23667

Description

Pick any QGIS tool for vector layers and run it in iterate mode, leaving the output field empty.

Run the tool: the process runs ok, but if you look into the c:\osgeo4w\bin folder you'll see a number of "memory_number" o kb files, one for each iteration. This file cannot be removed unless removing the temp layers from the project.

I'm sure that I've seen this files also on Linux, but I disregarded them and now cannot replicate or find them.
