

QGIS Application - Feature request #15770

[composer] allow expressions for legend item text

2016-10-27 08:04 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 23692
Priority:	Normal	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>In the layer panel, it's possible to show the count of features on any layer. And this count can be shown in the composer legend. Sometimes, instead of the number of features, it might be interesting to show in the legend the total area covered by a class.</p> <p>Now that aggregate functions are available, It could be nice to be able to show total length/area of features of a class, or statistics on a particular field of the layer, or any other combination...</p>		

History

#1 - 2016-10-27 08:05 AM - Harrissou Santanna

- Subject changed from *Being able to show aggregate values besides layer classification* to *Being able to show other aggregate values besides classification in the layer panel or composer legend*

#2 - 2016-10-27 12:00 PM - Nyal Dawson

- Subject changed from *Being able to show other aggregate values besides classification in the layer panel or composer legend* to *[composer] allow expressions for legend item text*
