<b>Description</b>			
<p>Currently we have the following default width for buffers:</p> <ul style="list-style-type: none"><li>- ogr 1000</li><li>- qgis 10</li><li>- v.buffer.distance: no default</li><li>- saga 100</li></ul> <p>Better set them all to 100, for predictability. Furthermore, the saga one dissolves by default, which does not seem adequate.</p>
