

QGIS Application - Feature request #15792

SLD based style NOT used when loading a shapefile

2016-10-31 06:40 AM - Richard Duivenvoorde

Status: Open	
Priority: Normal	
Assignee:	
Category: Symbology	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 23712
Description	
<p>Not sure if this is deliberate or an issue, but when a shapefile xxx has a QML-style file next to it with the same filename xxx, that style is used when loading the shapefile in QGIS.</p> <p>BUT when I saved a style in sld format (instead of qml format), the sld file is NOT used to style the shapes.</p> <p>I think it would be good to make this work for both types of style exports?</p>	

History

#1 - 2017-05-01 01:02 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#2 - 2017-09-22 09:55 AM - Jürgen Fischer
