QGIS Application - Feature request #15823
allow negative map rotation value in print composer

2016-11-07 03:03 PM - Jamie Robertson

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	23743

Description

In the main qgis map canvas, the map can be rotated with both positive and negative values. This is handy because it is easy to nudge a display in either direction. If a negative value is used, this has to be translated (360-#value#) to achieve the same rotation in the print composer. Allowing a negative value in this field would allow a 1:1 translation. Another option would be a checkbox in the print composer 'Main Properties' area to 'set map rotation to map canvas rotation'.

Revision aaddfedd - 2017-05-30 09:18 AM - Nyall Dawson

[composer] Allow map rotation from -360 to 360

Fix #15823

Also reenable instant map refresh as map rotation changes. Since
map refresh is done in the background now, this is safe to reenable.
