

QGIS Application - Feature request #15833

Allow changing layer name in vector processing dialog

2016-11-10 11:47 AM - Guillaume Larocque

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/GUI	
Pull Request or Patch supplied:		Resolution: wontfix
Easy fix?:	No	Copied to github as #: 23753
Description		
<p>Since the integration of Processing in the vector tools of QGIS (≥ 2.16), it seems that it is not possible to choose the name of a layer from any of the dialogs. For example, the output of the buffer dialog will always be named "buffer" which is highly uninformative and can lead to a very confusing analysis workflow. I know we can rename them once they're on the canvas, but this is an unnecessary additional step.</p> <p>Please allow the user to choose the name of the layer in the dialog!</p>		

History

#1 - 2016-12-28 09:56 AM - Alexander Bruy

- Resolution set to wontfix
- Target version deleted (Future Release - High Priority)
- Priority changed from High to Normal
- Status changed from Open to Closed
- Category changed from Vectors to Processing/GUI

You can change this in Processing options: Processing → Options → General → Use filename as layer name
