QGIS Application - Bug report #15848 wrong German translations in processing GRASS modules

2016-11-15 12:16 AM - Andre Joost

Status:	Closed			
Priority:	Normal			
Assignee:	QGIS Translation Team			
Category:	Translations and international			
Affected QGIS version:2.18.0		Regression?:	No	
Operating System:		Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:	fixed/implemented	
Crashes QGIS or corru pits data:		Copied to github as #: 23766		
Description		ļ		

According to the help menue, v.build.polylines "Builds polylines from lines or boundaries".

In the toolbox, the German translation reads "Polygone aus Linien oder Umgrenzungen bilden", which promises something different.

As a sidenote, v.to.lines is described as "Vektorpolygone oder -pnkte in Linien umwandeln" (u in punkte is missing).

Both errors have influence on the search box of the processing toolbox.

Associated revisions

Revision 48a01db8 - 2017-05-01 03:43 AM - Jürgen Fischer

german translation fixes (fixes #15848)

History

#1 - 2016-11-15 09:51 AM - R. R.

Fixed "Vektorpolygone oder -p[u]nkte in Linien umwandeln" in Transifex.

#2 - 2017-05-01 01:02 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#3 - 2017-05-01 03:36 AM - Jürgen Fischer

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- Description updated

In the toolbox, the German translation reads "Polygone aus Linien oder Umgrenzungen bilden", which promises something different.

Also fixed in transifex.
