QGIS Application - Bug report #15867
QGIS Georeferencer crashes with large files

2016-11-20 09:42 PM - R L

Status:	Closed			
Priority:	High			
Assignee:				
Category:	C++ plugins/Georeferencer			
Affected QGIS version:	2.18.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	Yes		**Copied to github as #:**	23785

Description

Using both 2.18.0 and 2.14.8, the georeferencer tool struggles with files over a few mb. After entering a GCP and pressing okay, an error message comes up saying qgis has stopped working, and the program closes. Reducing file size appears to solve problem.

History

#1 - 2016-11-21 10:51 AM - Giovanni Manghi

- Category set to C++ plugins/Georeferencer

- Status changed from Open to Feedback

Can you please attach one of your files that make qgis crash. Thanks.

#2 - 2016-11-21 10:51 AM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from No to Yes

#3 - 2016-11-21 10:51 AM - Giovanni Manghi

- Priority changed from Normal to High

#4 - 2016-11-22 08:05 PM - R L

- File Peterfield_recon_1611_reg_90.jpg added

Attached. Thanks.

#5 - 2016-12-05 05:36 PM - R L

Still a problem with the latest nightly release. What's the way forward? Crashing most commonly occurs when using the scroll wheel to zoom in and out on a image.

#6 - 2017-01-03 05:50 AM - Giovanni Manghi

- Resolution set to not reproducable

It works everything just fine on qgis 2.18.2 on both Linux and Windows.

Please try a clean install by disabling/removing any 3rd party plugins and/or purging the .qgis2 folder.

Please reopen if necessary.
