QGIS Application - Feature request \#15882
Symbol Size assistant: updating the circle size according to values manually entered
2016-11-22 08:17 AM - Harrissou Santanna

| Status: Open <br> Priority: Normal <br> Assignee:  <br> Category: Symbology <br> Pull Request or  <br> Easy fix?: No | Resolution: <br> Copied to github as \#: 23800 |
| :--- | :--- | :--- |
| Description |  |
| When setting a proportional symbol with the size assistant, there's a widget showing circles and their value. |  |
| Currently, user can click the label and change the values, and validate. But nothing happens (see \#15881). |  |

- Easy fix? set to No
\#2-2018-02-23 03:30 PM - Harrissou Santanna
- Description updated

For record, In 3.0, this label is no longer editable but I think this feature request could still be valid : allow user to have a customized legend
