

QGIS Application - Bug report #15883

Rotate Point Symbols not working

2016-11-23 03:32 AM - Andre Jesus

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Digitising	
Affected QGIS version:	2.18.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 23801
Description		
Case 1: Working		
1. Create new feature		
2. Rotate symbol using Rotate Point Symbols		
3. Save Layers Edits		
Case 2: Not Working		
1. Create new feature		
2. Save Layers Edits (rotate angle is null)		
3. Toggle Editing		
4. Rotate symbol using Rotate Point Symbols		
5. Save Layers Edits		
Case 3: Working		
1. Toggle Editing		
2. Rotate already existing and rotated symbol using Rotate Point Symbols		
3. Save Layers Edits		
Rotate Point Symbols only works when creating or editing a existing rotated feature but not when editing an existing one if the original rotation value is null.		
QGIS 2.8.6 tested and fully working.

Works correctly here (using a shapefile). Can you do some more digging to see exactly what triggers this, or share a project & data file demonstrating the issue?

#2 - 2016-11-24 04:01 AM - Andre Jesus

Yes, you are right. Yesterday I tested Shapefiles and SQLite and both worked fine.

So, today I recreated all (spatial) indexes and it seems to correct the problem. I can't think the reason It worked tho...

Data source: MS SQL Server 2016.
