QGIS Application - Bug report #15884
memory access exception at exit qgis 2.18

2016-11-23 05:53 AM - Jan Heckman

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Build/Install			
Affected QGIS version:	2.18.0		**Regression?:**	No
Operating System:	windows		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	not reproducable
Crashes QGIS or corrupts data:	Yes		**Copied to github as #:**	23802

Description

Hi,

Have this minor problem with several versions of Qgis desktop w and wo grass.

The dump file is attached.

From a chance I got to attach a debugger (no symbols) I think it's not a nullptr, but a oneptr, pun intended.

At some point I believed I caused it by modifying etc/ini/python-core.bat by adding the (2nd) line:

SET PYTHONPATH=%OSGEO4W_ROOT%\\apps\\qgis\\python;%PYTHONHOME%\\Lib\\site-packages;%PYTHONPATH%

to prevent python version mixup's, but I cannot get rid of the fault by removing the line.

OS: Win 7 64 (prof) and Win 10 64 (home)

Since I could not find a similar report (hope I didn't miss any), I filed this one.

Best regards

Jan

- Priority changed from Normal to High

#2 - 2017-03-07 04:26 AM - Giovanni Manghi

- Status changed from Open to Feedback

- Category set to Build/Install

Can you please add detailed steps on how to replicate or just try 2.18.4/master and see if this is still valid? thanks.
