

QGIS Application - Feature request #15885  
GeoPDF Export Feature for QGIS Map Composer

2016-11-23 06:47 AM - Mickey Dietrich

Status:	Closed	Resolution: Copied to github as #: 23803
Priority:	High	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
It would be great if QGIS could have the ability to export to a GeoPDF in composer, so we can create maps with graphics and have them able to be used by Avenza PDFMaps mobile application. If QGIS were to have this functionality, we would be able to utilize QGIS for most all our mapping needs.

I don't know if you are talking about something else but have you seen this  
<http://qgis.org/en/site/forusers/visualchangelog216/index.html#feature-georeference-outputs-eg-pdf-from-composer?>

#2 - 2016-11-23 10:15 AM - John Tull

- Status changed from Open to Closed

I juste tested a pdf map exported from QGIS print composer, and it imported fine to Avenza Maps on an iOS device.
