Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>When using Settings - Snapping Options - Layer selection:Advanced</p> <p>It would be incredibly useful to have either a checkbox on the header where you can sort by Checked (sorting appart from name does not work BTW) to toggle all layers snapping on/off. This would be particularly useful when you want to snap only to 2-3 layers out of 100s but it is currently set to snap to half/all of them. From experience it can be frustrating and take unnecessarily long time to go by and switch of snapping of each layer one by one.</p> <p>Another, maybe better solution would be if you select multiple layers in the Snapping Options and toggle 1 layer, then all selected layers get toggled. This would be consistent with wide range of other software that use check boxes.</p>
