

QGIS Application - Bug report #15936

Drag and drop import/export broken in DB manager

2016-12-04 12:51 PM - Giovanni Manghi

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category: Browser	
Affected QGIS version: 2.14.9	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 23852

Description

Something broke in between point releases of 2.14

On 2.14.3 I can import the attached shapefile (as example) with the d&d in Browser into a PostGIS or Spatialite database.

On 2.14.9 the d&d to PostGIS returns

Failed to import some layers!

localidades: Creation of data source "teste1"."localidades" failed:

ERROR: syntax error at or near ";"

LINE 1: CREATE TABLE "teste1"."localidades"(), PRIMARY KEY ()

On 2.14.3 I can d&d from Spatialite do PostGIS, while on 2.14.9 it fails with the same error as above.

History

#1 - 2016-12-04 02:36 PM - Giovanni Manghi

- Subject changed from *Drang and drop import/export broken in DB manager* to *Drag and drop import/export broken in DB manager*

#2 - 2017-02-27 03:14 PM - Giovanni Manghi

- Resolution set to *fixed/implemented*

- Status changed from *Open* to *Closed*

works as expected on 2.18.4.
