Drag-and-drop form: impossible to drag fields into the right form panel

2016-12-09 06:46 AM - Harrissou Santanna

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Forms	
Affected QGIS version:	master	Regression?: Yes
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch applied:		Resolution: not reproducible
Crashes QGIS or corrupts data:		Copied to github as #: 23880
Description		
<p>Layer's properties --> Fields tab, drag-and-drop editor layout activated</p> <p>Trying to create a feature form, I'm not able to move fields to the form with drag-and-drop system. Actually, It worked at the beginning and once I added a category, it no longer worked. Dragging a field, it doesn't follow the pointer until landing in the right panel (see screenshot). So the only way to add fields is to use the right arrow button and the move it with other arrows. But That means there's no way to embed a relation form.</p> <p>I cancelled the Layer's properties dialog and reopened it, began a new project, relaunched QGIS, all this without success.</p> <p>Note that this also puts the pointer into a weird state where, unless hitting ESC, no dialog can interact with it.</p> <p>Drag-and-drop function to build a form in 2.18 on Windows works smoothly.</p>

It seems to be fixed in a recent master (from 9068feafc9cc9e938c0450952efcb3c3f71e50b8 or even fresher)

#7 - 2017-07-10 11:02 AM - Hugo Mercier

My bad, no, it has not been automagically fixed ...

#8 - 2018-01-16 05:36 AM - Nyal Dawson
- Status changed from Open to Feedback

Not reproducible on master - the whole form widget has been redesigned, so I don't think this bug is present anymore.

#9 - 2018-01-24 09:13 AM - Nyal Dawson
- Resolution set to not reproducible
- Status changed from Feedback to Closed

Closed due to lack of feedback
