

QGIS Application - Bug report #1598

New Attribute Table Suppresses PostGIS Table Column

2009-03-27 06:10 AM - Horst Düster

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Data Provider	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11658
Description	
After open a [[PostGIS]] layer attribute table not all columns are displayed. Always the last defined column from table definition is suppressed. Instead a nameless column with NULL appears. It seems that the geometry column is not correct supported.
