Easy fix?: No	Copied to github as #: 23908
Description	
<p>In the Advanced digitising panel when you create a line and want to make an angle change at a vertex the angle in the "a" field is relative to the angle of the line of the previous two vertices. Can there be a setting where you can select "angles relative to true north" as an option? This would make it easy to draw up titles or deed documents which all have angles relative to true north.</p>
