QGIS Application - Bug report #160
GRASS: Deleting attributes

2006-06-29 05:34 AM - holl-gdf-hannover-de -

Status:	Closed			
Priority:	Low			
Assignee:	Redmine Admin			
Category:	GRASS			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	10219	

Description

Dear devs,

when I try to delete an Attribute in GRASS digitize-mode (from edit attribute-menu) I get a confirmation window with yes or no. The attribute will always be deleted also I I press 'no'.

AFAIK the delete process should be stoppe when hitting this button then.

Best
    Stephan

I think that you mean the message:
"Orphan record was left in attribute table. Delete the record?"

That is correct. The category (link to record) is deleted immediately
from the feature (geometry). Then the vector file is checked if
more features are lined to the same record. If not you are asked
if the 'orphan' record shoud be deleted. So if you click on 'No'
the record is left in table.

Radim

PS: Please describe better the message next time.
