

QGIS Application - Feature request #16011

Improvements to Processing:qgis:network analysis

2016-12-24 02:16 AM - Paolo Cavallini

Status: Open	
Priority: Normal	
Assignee:	
Category: Processing/QGIS	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 23926
Description	
I suggest to: <ul style="list-style-type: none">- display start and end point for shortest path (point to point)- send a message to the user in case something goes wrong (e.g. tolerance is too low, so no path is generated)- default speed (5) seems to low- if the projection is in degrees (e.g. EPSG:4326), and the user chooses a too high tolerance (e.g. 2 degrees), the path is apparently not computed; better warn the user about this.
